The guidance provided above constitutes forward-looking statements and actual results may differ materially. Refer to the “Forward-Looking Statements” safe harbor section below for information on the factors that could cause our actual results to differ materially from these forward-looking statements.

The information presented in this press release includes non-GAAP financial measures such as “non-GAAP operating income,” “non-GAAP net income,” and “non-GAAP diluted net income per share.” Refer to “Non-GAAP Financial Measures and Other Metrics” for a discussion of these measures and the financial tables below for reconciliations of each non-GAAP financial measure to the most directly comparable GAAP financial measure. The Company has not included a quantitative reconciliation of its guidance for non-GAAP operating income and non-GAAP diluted net income per share to their most directly comparable GAAP financial measures because certain of these reconciling items, including stock-based compensation and amortization of intangible assets, could be highly variable and cannot be reasonably predicted without unreasonable effort. This is due to the inherent difficulty of forecasting the timing of certain events that have not yet occurred and are out of the Company’s control and the amounts of associated reconciling items. Please note that the unavailable reconciling items could significantly impact the Company’s GAAP operating results.

Forward-Looking Statements

This press release contains express and implied “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995, including statements regarding our financial outlook for the first quarter and fiscal year 2025, growth strategy, business plans and market position. In some cases, you can identify forward-looking statements by terms such as “anticipate,” “believe,” “estimate,” “expect,” “intend,” “may,” “might,” “plan,” “project,” “would,” “should,” “could,” “can,” “predict,” “potential,” “target,” “explore,” “continue,” “expand,” “outlook” or the negative of these terms, and similar expressions intended to identify forward-looking statements. By their nature, these statements are subject to numerous uncertainties and risks, including factors beyond our control, that could cause actual results, performance, or achievement to differ materially and adversely from those anticipated or implied in the statements, including: our ability to continue our growth at or near historical rates; our future financial performance and ability to be profitable; the effect of global events on the U.S. and global economies, our business, our employees, our results of operations, our financial condition, demand for our products, sales and implementation cycles, and the health of our clients’ and partners’ businesses; our ability to prevent and respond to data breaches, unauthorized access to client data or other disruptions of our solutions; our ability to effectively manage U.S. and global market and economic conditions, including inflationary pressures, economic and market downturns and volatility in the financial services industry, particularly adverse to our targeted industries; the length and variability of our sales cycle; our ability to attract and retain clients; our ability to attract and retain talent; our ability to compete in highly competitive markets, including AI products; our ability to manage additional complexity, burdens, and volatility in connection with our international sales and operations; the successful assimilation or integration of the businesses, technologies, services, products, personnel or operations of acquired companies; our ability to incur indebtedness in the future and the effect of conditions in credit markets; the sufficiency of our cash and cash equivalents to meet our liquidity needs; and our ability to maintain, protect, and enhance our intellectual property rights. Additional risks and uncertainties that could cause actual outcomes and results to differ materially from those contemplated by the forward-looking statements are included under the caption “Risk Factors” and elsewhere in our Annual Report on Form 10-K, our Quarterly Reports on Form 10-Q, and any subsequent public filings. Moreover, we operate in a very competitive and rapidly changing environment, and new risks may emerge from time to time. It is not possible for us to predict all risks, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results or outcomes to differ materially from those contained in any forward-looking statements we may make. Forward-looking statements speak only as of the date the statements are made and are based on information available to us at the time those statements are made and/or management’s good faith belief as of that time with respect to future events. We assume no obligation to update forward-looking statements to reflect events or circumstances after the date they were made, except as required by law.

Non-GAAP Financial Measures and Other Metrics

This press release contains the following non-GAAP financial measures: non-GAAP gross profit, non-GAAP gross margin, non-GAAP recurring gross profit, non-GAAP recurring gross margin, non-GAAP operating expenses, non-GAAP operating income, non-GAAP net income and non-GAAP diluted net income per share. These non-GAAP measures exclude the impact of stock-based compensation, amortization of intangible assets, lease modification and impairment, change in fair value of contingent consideration, transaction costs, restructuring and other costs and the income tax effect of non-GAAP adjustments. See below for a reconciliation of each non-GAAP financial measure to the most directly comparable GAAP financial measure.

Free cashflow is a non-GAAP financial measure, and a supplemental liquidity measure that management uses to evaluate our core operating business and our ability to meet our current and future financing and investing needs. It consists of net cash provided by operating activities less cash paid for purchases of property and equipment. See below for a reconciliation of each non-GAAP financial measure to the most directly comparable GAAP financial measure.

Other metrics include total ARR, Cloud ARR and net revenue retention rate. Total ARR represents the annualized recurring value of all active SaaS and on-premise subscription license contracts at the end of a reporting period. Cloud ARR is the portion of the annualized recurring value of our active SaaS contracts at the end of a reporting period. Contracts with a term other than one year are annualized by taking the committed contract value for the current period divided by number of days in that period, then multiplying by 365.

Net revenue retention rate is calculated by starting with the ARR from the cohort of all clients as of the twelve months prior to the applicable fiscal period, or prior period ARR. We then calculate the ARR from these same clients as of the current fiscal period, or current period ARR. We then divide the current period ARR by the prior period ARR to calculate the net revenue retention rate.

We believe these non-GAAP financial measures and metrics provide useful information to investors as they are used by management to manage the business, make planning decisions, evaluate our performance, and allocate resources and provide useful information regarding certain financial and business trends relating to our financial condition and results of operations. These non-GAAP financial measures, which may be different than similarly-titled measures used by other companies, should not be considered a substitute for, or superior to, the financial information prepared and presented in accordance with GAAP.

Guidance for non-GAAP financial measures excludes stock-based compensation expense and amortization of intangible assets. Non-GAAP diluted net income per share is calculated by dividing non-GAAP net income by the estimated diluted weighted average shares outstanding for the period.

Free cash flow ⁽²⁾	<u>\$ 64,774</u>	<u>\$ 25,275</u>

(1) Consists of acquisition-related transaction costs and costs related to certain non-capitalized offering-related expenses.

(2) Beginning with the second quarter ended December 31, 2023, we have excluded capitalized internal-use software costs and cash paid for interest from the calculation of our free cash flow, which we believe better aligns with industry standard. Our free cash flow for prior period presented were recast to conform to the updated methodology and are reflected herein for comparison purposes.
